

NEEDS IDENTIFIED BY TI GEORGIA'S COMMITTEES OF CONCERNED CITIZENS IN ADJARA IN 2019

TI Georgia's Committees of Concerned Citizens (CCCs) have identified more than 40 infrastructural problems/needs in 8 settlements of 4 municipalities (Khulo, Keda, Shuakhevi, Batumi) of the Autonomous Republic of Adjara.

Supply of drinking and irrigation water; repair of internal roads and drainage canals; reinforcement of landslide-prone zones; installation of street lighting; renovation of kindergartens and sports infrastructure; access to the Internet; taking care of monuments of cultural heritage – this is an incomplete list of the needs for the resolution of which the organization has already applied to the municipalities.

The Committees of Concerned Citizens are informal associations of citizens created on the initiative of our organization which aim to resolve problems in municipalities with direct involvement of local population and with mediation by our organization.

It should be noted that members of the CCCs identified more than 50 infrastructural problems/needs in Adjara in 2018, and 27 of them were fully or partially reflected in the municipal budgets of 2019. TI Georgia is going to present a report on the CCCs' activities to the public in the nearest future.

Currently, work is actively underway on the draft budget of the Autonomous Republic of Adjara and those of municipalities of Adjara. We think that the present document of the CCCs should become an important source for the Ministry of Finance and Economy of the Autonomous Republic of Adjara and for local municipalities in the planning of the next year's budgets.

With this aim, we are presenting a list of problems named by citizens:

ADJARA

KEDA, VILLAGE OF VAIO	
TYPE OF PROBLEM	DEMAND OF POPULATION
Poor infrastructure	<ul style="list-style-type: none"> Rehabilitation of the gym of the school, renewal of sports equipment Improvement and equipment of the yard of nursery
Poor road infrastructure	<ul style="list-style-type: none"> Repair of drainage canals on central and internal roads Installation of street lighting on internal roads

KEDA, VILLAGE OF KVASHTA	
TYPE OF PROBLEM	DEMAND OF POPULATION
Poor road infrastructure	<ul style="list-style-type: none"> Rehabilitation of internal roads, arrangement of new roads to remote neighborhoods Installation of street lighting on internal roads Repair of drainage canals on central and internal roads
